Integrated Measurement, Report & BSA
Tools for Veterinary Applications

SonoHelp

Designed specifically for veterinarians, this embedded software provides reference imaging planes and guidance on proper scanning techniques, with support for custom additions of images or videos.
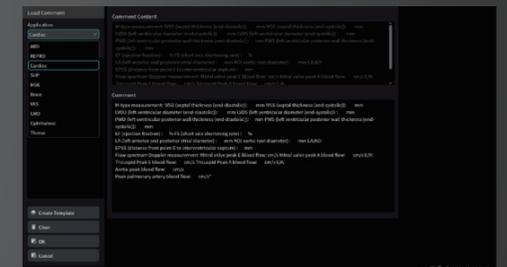

SonoMeasure

SonoMeasure features built-in measurement reference ranges for animals of different sizes, automatically alerting to potential clinical symptoms for early detection and timely intervention.

SonoMagnifier

The measurement magnifier allows you to see all the details with precision.

SonoReport

Sono-Report is a built-in veterinary report template covering ABD, Cardiac, Uro, Ophthalmic, and Repro applications, simplifying routine companion animal diagnoses for veterinarians.
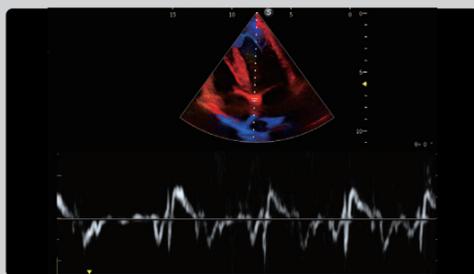

Guardian of Companions
# Guidance for Care

Canine Kidney

Canine Biliary Sludge

TDI PW Mode

Tissue Doppler Imaging for precise assessment of myocardial motion and velocity, aiding in evaluation of heart function.

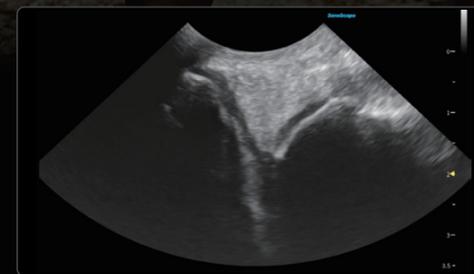

μ-Scan

Delicately engineered to reduce speckles, improve image uniformity, and enhance border continuity, providing authentic presentation of details and enhanced lesion display.
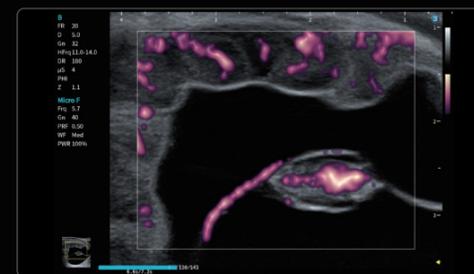

Feel Every Heartbeat
Empower Every Stride

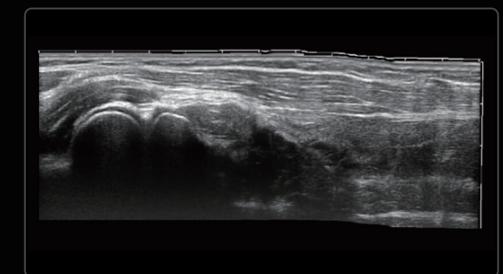

Equine Hoof Socket

Equine Tendon

Micro F

Micro F mode clearly visualizes microvascular flow around the equine embryonic vesicle, revealing fine vessel details with outstanding microflow sensitivity.

Panaromic

Real-time 2D and Color/Power Doppler Panoramic Imaging enables to extend the field of view and any mistakes can also be easily back tracked and corrected without interrupting the scan.
